About Me

5+ years of experience in building dynamic web applications and e-commerce solutions.
Proficient in **WordPress**, **CS-Cart**, **WooCommerce**, **PHP(Laminas/Zend), React.js+Node.js** with a focus on customizing platforms to meet client needs. Strong expertise in frontend design and backend integration, delivering user-friendly and scalable solutions.

Skills

- **CMS & E-Commerce:** WordPress+ WooCommerce (Elementor, Nicepage), CS-Cart, Bitrix, Tilda

- **Frontend:** HTML5, CSS3, JavaScript (Typescript), React.js

- **Backend:** PHP (Zend/Laminas), SQL, REST API Integration, Node.js

- **Tools:** GitHub, GitLab, Docker, JIRA, Photoshop, AI

- **Soft Skills:** Agile Collaboration, Problem-Solving, Continuous learning**,** Cross-functional Leadership

- **Languages:** English (B2), Ukrainian (Native), Polish (B2), Russian (Native)

Professional Experience

Fullstack Developer, ZF Group, Wrocław (Poland) Mar 2022 – Present

- Developed internal tools using **PHP (Laminas/Zend)** , **React.js , Wordpress** for real-time production monitoring , record keeping , quality testing, test results tracking, dashboards and more for various needs of different departments in the corporation (total realized 20+ projects with >= 80% of my contribution)

- Integrated **SQL databases** to store and manage production data efficiently.

- **Key Project:** Created interactive dashboard with 3D visualization of all production lines and production steps, providing real-time sensor data for engineers and allowing them to react in advance, which reduced production downtime to a minimum and allowed for efficient process control.

Web Developer (freelance), Odesa (Ukraine) Feb 2019 - Mar 2022

- Developed **50+ web projects**, including e-commerce stores and landing pages. Most projects were built using **WordPress**, **CS-Cart**, and **Bitrix**, leveraging tools like **Elementor** and **Nicepage** for rapid prototyping and customization.

- Implemented client-requested features (e.g., custom filters, dynamic content blocks) through platform configurations and minimal code adjustments or using plugins.

- Utilized **Tilda** for simple landing pages requiring minimal post-launch maintenance.

- Collaborated with subcontractors for tasks like layout design or content population only during peak workloads, while retaining control over architecture and core development, A-B testing, SEO.

- **Key Project:** Independently designed and developed a **CS-Cart-based e-commerce platform** with **100,000+ products**, handling the entire lifecycle—from UI/UX design and payment gateway integration to product population , graphics and SEO. The platform has been **operating successfully for over 5 years** (and still), processing daily orders.

Education

Bachelor's Degree in Computer Systems and Software Development
Odessa I.I. Mechnikov National University, Odesa, Ukraine. Graduated: 2017
